Companion to: `PADEL_AI_VENTURE_PLAN.md` (strategy) **This document:** what we DO, WHEN, with WHOM, for HOW MUCH **Status:** v0.1 draft — pre-Gate 0 **Authored:** 2026-07-01 **Reading time:** 15 min (executive summary 2 min)

A. Executive Summary (the 1-page for backers)

The opportunity: Padel is the world's fastest-growing sport (+1,026% search interest since 2004). India has 500 courts today (up from ~90 in 2023), projected to hit 5,000+ by 2036. Padel entered the 2026 Asian Games — a once-per-sport-lifecycle catalyst. No India-headquartered AI coaching platform exists. Window: 12–18 months.

The product: An AI coach (not a camera) that records padel matches via a single IP camera per court, runs computer vision on every shot, scores technique against an expert-coach-designed rubric, and delivers actionable improvement feedback to the player on WhatsApp within 10 minutes of match end.

The team: - **Manoj Maheshwari** (CEO) — SMB SaaS operator (AutomationXpert), WhatsApp distribution expert - **Padel Coach (CCO)** — domain authority + rubric IP (named TBD) - **CTO / ML Co-founder** — primary target João Silva (`padel_analytics` author, EU); fallback Bangalore CV hire - **Technical advisor:** Apple AI engineer (Manoj's son — pending discussion)

The ask (pre-seed): ₹2.5 Cr / \$300k for 18 months runway → 25 paying clubs in 3 Indian cities, full V1 product, founding team complete, Series A-ready.

Beachhead: Mumbai → Pune → Bangalore. **Then:** UAE (Year 1.5), KSA + SE Asia (Year 3). **Anti-China by geography** — India + Middle East procurement-policy moat.

Unit economics: ₹540 COGS/court/month, ₹5,000 ASP → 89% gross margin. Same shape as Clutch.

The moat: Coach-designed proprietary rubric + WhatsApp-native distribution + federation-level lock-in. Not tech. Tech is commodity.

Why now, why us: - Asian Games 2026 timing window - Manoj's AX platform = built-in distribution muscle no global competitor has in India - India has the ML talent at 1/5th Western cost - Bank-rollable by existing angel network; no VC dependency at pre-seed

H. Technical Talent — India bench (answer to your question)

The bench in India is **deep, accessible, and ~5x cheaper than EU/US**. Hard numbers:

H.1 India ML / CV talent supply

TIER	WHAT YOU GET	INR SALARY	WHERE TO SOURCE
Senior CV/ML engineer (4–7 yrs, pose/tracking)	Can refactor <code>padel_analytics</code> , train classifier, ship to prod	₹35–60 LPA full-time, ₹2.5–4 LPA/mo contract	LinkedIn, Cutshort, Wellfound (formerly Angellist Talent), CV Slack communities
Mid-level ML engineer (2–4 yrs)	Train + tune classifier, integrate inference	₹15–28 LPA	Same + IIT/IIIT/IISc placement networks
CV specialist (5+ yrs) w/ sports background	If we want pure thoroughbred	₹50–90 LPA	Niche — try Sports Mechanics, Hawk-Eye India alumni
Junior ML / fresh grad	Bulk model-training labour, data pipelines	₹6–12 LPA	IIT/NIT placements direct

Bangalore = the deepest CV pool in India. Hyderabad and Pune are #2. NCR (Delhi) is fintech-heavy, less CV.

H.2 Hiring channels — ranked

1. **LinkedIn paid + Wellfound** — fastest yield for senior roles
2. **IIT/IISc placement cells** — best for fresh grads, free
3. **Cutshort / Hirect** — Indian-specific platforms with CV filters
4. **Twitter/X CV community** (`#cv` `#opencv` hashtags) — for senior thoroughbreds
5. **GitHub padel/tennis CV repo contributors** — direct outreach to ArtLabss, padel_analytics, TennisCourtDetector forkers (proven interest in the problem)

H.3 Cost comparison vs other markets

MARKET	SENIOR CV ENGINEER/MO (INR EQUIVALENT)	MULTIPLIER
Bangalore	₹3.5 lakh	1.0x
EU (Berlin, Madrid)	₹15–22 lakh	4–6x
US (SF, NY)	₹35–60 lakh	10–17x
Shenzhen / Beijing	₹6–10 lakh	2–3x

Capital efficiency moat: Same ML quality at 1/4 of EU price, 1/10 of US. This is real and matters for Series A multiples.

H.4 Verdict on “are we covered on technical?”

Yes — provided we hire correctly. Three rules: 1. **Don’t compromise on the lead CV/ML hire** (founding role). Pay for excellence here — every junior follows. 2. **Lean on the open-source maintainer network first** (João, ArtLabss, yastrebkv, UPC-ViRVIG) — they have the specific domain experience that takes a generic CV hire 6 months to build 3. **Build remote-first; don’t insist on Bangalore-office.** Best CV folks in India are remote-mode already.

K. Governance & Review Cadence

K.1 Weekly

- **Monday 9am:** Founders sync (30 min). Review previous week's milestones. Lock current week priorities.
- **Friday 6pm:** Metrics review — clubs live, matches analysed, classifier accuracy, MRR, runway months.

K.2 Monthly

- **First Monday:** Board / advisor monthly update (1-page).
- **Mid-month:** China watch list review (per Section 4.6 of venture plan).
- **End of month:** Budget burn vs plan. Re-forecast if >10% off.

K.3 Decision gates

Use the 7-gate model from venture plan §13. **Gate failures = automatic Friday emergency review, not next-Monday.**

L. Backer Pitch — Talking Points (use these in conversations)

L.1 The hook (45 seconds)

"Padel is the world's fastest-growing sport — search interest up 1,000% since 2020. India just hit 500 courts, projected 5,000+ by 2036, growing 70% a year. Padel enters the Asian Games in 2026. No India-headquartered AI coaching platform exists. We're building it — coach-led, WhatsApp-native, defensible by geography against Chinese tech. Pre-seed of ₹2.5 Cr for 18 months runway, target 25 paying clubs and Series A-ready by month 18."

L.2 The differentiation (when they ask "why won't Clutch / China kill you?")

"Three moats Chinese tech can't easily replicate in India: (1) procurement-policy wall — Indian clubs face geopolitical risk choosing Chinese SaaS, same reason TikTok is banned. (2) A WPT-trained padel coach as co-founder, designing the technique-scoring rubric — that's the data moat, not the code. (3) WhatsApp-native distribution at SMB-club scale — I run AutomationXpert which has shipped this exact muscle into 250+ Indian businesses. Clutch sells direct in Europe; their India arm is one team in Bangalore. We can move faster on home turf."

L.3 The capital efficiency (when they ask burn rate)

"₹230 lakh over 18 months. We're founder-funded for the first 3 months to hit 5 clubs and a working classifier. Then ₹2.5 Cr pre-seed gets us to 25 clubs, ₹50L MRR, founding team complete. India ML talent is 1/4 of European cost — our gross margin profile (89%) is identical to Clutch's, but our CAC is half theirs because of WhatsApp distribution. Series A target ₹15–20 Cr at Month 18 for India scale + UAE entry."

L.4 The exit story (when they ask outcome)

"Three credible paths: (a) Acquisition by Epic Padel or a global rollup — they already raised \$10M to consolidate. We're the India play they'd buy. (b) Strategic acquirer in Indian sports — Hudle, Playo, KheloMore, or a corporate (Bajaj Sports, Decathlon India) — buying for the AI capability. (c) Continued growth path through Series A/B if Asia thesis plays out — \$50–100M Series B in 4 years is achievable at the right multiples on padel growth."
