

FOUNDER OUTREACH BRIEF — FINALISED FOR SEND

Outreach to João Silva — Round 2

Humble, exploratory positioning. Non-technical player asking for a 30-minute Google Meet. No equity offer, no team invite, no expectations beyond the conversation itself.

TARGET

João Silva — padel_analytics

EMAIL

jsilvawasd@hotmail.com

ASK

30-min Google Meet, on his time

PREPARED

2026-07-03

Purpose: A low-commitment 30-minute Google Meet with João Silva. Positioning: non-technical padel player exploring what it would take to build a Clutch-like system for his own club in India. **No co-founder invite. No equity offer. No team invite. No expectations.** Any paid technical consultancy is a possibility for later, on his terms, only if the conversation warrants it.

Companion: `JOAO_OUTREACH_EMAIL.md` (v1 — full co-founder invite draft; kept for reference but not being sent).

Send from: Manoj's personal email (Gmail or manoj@automationxpert.in) **Send to:** jsilvawasd@hotmail.com (per repo README, verified 2026-07-01) **Subject:** A 30-minute conversation about your `padel_analytics` work — from a non-technical padel player in India

Tone: Humble, exploratory, learning-mode. Not selling. Let João define what he wants once the conversation happens.

EMAIL BODY (copy-paste-ready)

Subject: A 30-minute conversation about your `padel_analytics` work — from a non-technical padel player in India

Hi João,

A quick intro. I'm Manoj Maheshwari, based in Mumbai. I run a small software business here (AutomationXpert), but I want to be upfront that I am **not a technical person myself** — I don't write code and I don't have a CV/ML background. I am a padel player. I play three or four times a week at my club, and like a lot of Indian players I have been wondering whether some version of what platforms like Clutch offer could exist for us here.

Why I'm writing to you. I've spent the last few weeks reading through the open-source padel-vision projects on GitHub, and yours — `Joao-M-Silva/padel_analytics` — looks like the most serious, most complete piece of work in the space. I don't have the technical depth to fully appraise it, but reading your README and the structure of what you've built, it seems clear that a substantial part of the underlying work is already done. What I don't know is how far it is from a working, deployable system, and what would be involved in going that last distance — especially for the specific case of one Indian club, adapted for our conditions.

What I'd like from you. Just a **30-minute conversation on Google Meet**, at your convenience. Nothing more than that. I'd like to hear directly from you — as the person who built this — about:

- What you have already built and how far along it is
- Where you feel the real remaining work sits between your current codebase and something close to a Clutch-like product
- Whether, in your view, it's feasible for someone in my position to replicate/adapt what you have for a single Indian club to start with, and later maybe a handful more
- What kind of technical help I would need to source, and roughly what that looks like

No expectations on my side beyond the conversation itself. I am not writing to propose a partnership, a role, equity, or anything of that kind. I don't want to arrive with a term sheet before I even understand the ground reality. If, after we talk, it turns out that you'd be willing to offer some form of paid technical consultancy or advisory — a fixed engagement, an hourly arrangement, whatever shape suits you — I'd be very interested to explore that on your terms. But that would be a conversation for later, and only if you feel it makes sense.

For now, all I'm asking for is 30 minutes of your time to help me understand where the technology actually stands. I'll come prepared with questions and won't waste the time.

I'm in IST (UTC+5:30) and can flex around any European time zone. Three options that work on my side, but I'll happily move to any slot you prefer:

- Wednesday July 8, 4:00 PM IST / 11:30 AM Lisbon
- Thursday July 9, 6:00 PM IST / 1:30 PM Lisbon

- Monday July 13, 5:00 PM IST / 12:30 PM Lisbon

If none of those work, please just suggest whatever suits you.

Thank you for putting this work out in the open — even the option of having this conversation with the person who built it is not something I take for granted.

Warm regards, Manoj Maheshwari Mumbai, India WhatsApp: +91 98200 27850 LinkedIn: linkedin.com/in/manojmaheshwari

Why this version (deltas from v1)

- **Non-technical framing:** Explicit “I am not a technical person” upfront — removes any risk of him perceiving me as a peer who might extract knowledge and walk. Signals learner, not competitor.
- **India-only scope:** No Asia, no Middle East, no Asian Games framing. “For my own club to start with, later maybe a handful more.” Reduces the perceived commercial threat.
- **No co-founder / equity / team invite:** Removes anything he might feel obligated to consider or refuse. Zero ask beyond the meeting itself.
- **Paid technical consultancy** mentioned only as *his call, later, if he wants* — not a proposal. Preserves the option without triggering a “what’s your offer?” reflex.
- **No P.S., no pitch tail:** v1’s WhatsApp-distribution P.S. was pitch-flavoured; removed.
- **Removed “expectations from the association” section:** Building expectations of my own is exactly the trap this rewrite is meant to avoid.

What to do before pressing send

CHECK	WHY
Confirm the archival of <code>padel_analytics</code> and related OSS repos + model weights is complete	Defensive measure — so nothing is lost if he restricts access after the conversation
Confirm <code>jsilvawas@hotmail.com</code> is still active per repo README	Re-verify on send day
Send Tue–Thu, 10am–noon Lisbon time	Higher reply rate
Do NOT BCC anyone	Trust signal

Follow-up cadence

- **Day 4** no reply: single-line nudge ("Hi João — floating this back up in case it got buried. Happy to talk whenever works.")
- **Day 10** no reply: final nudge, small update ("Wanted to add one thing — I'm not on any timeline; the 30-min call whenever you have it is genuinely all I'm asking.")
- **Day 14** no reply: pause 6 weeks; re-engage later with a low-key update.

v2 prepared 2026-07-03. Humble/exploratory positioning per Manoj's brief.

Companion document set: Strategic Venture Plan · Project Report · Technical Feasibility · Commercial Report · Base Club Offer · Technical Review Request.
